EDUCATION

- University School of Information, Communication and Technology (GGSIPU)** Delhi, India
Bachelor of Technology - Information Technology Nov 2023 – Jul 2027
- Bhai Parmanand Vidya Mandir** Delhi, India
Higher Secondary - 96% Apr 2021 – Mar 2023

SKILLS SUMMARY

- AI & Tools:** Ai-Sdk, Langchain, LangGraph, CrewAI, n8n, TensorFlow, Scikit-learn
- Languages:** TypeScript, JavaScript, Python, C, C++
- Frameworks & Libraries:** Next.js, React.js, Node.js, Express.js, Hono, Zustand, FastAPI, Flask
- Databases:** MongoDB, PostgreSQL, MySQL, Redis, Supabase, Appwrite
- DevOps & Cloud:** Docker, AWS, Git, GitHub Actions, Expo
- Core Competencies:** Full Stack Development, API Design, Generative AI Integration, System Architecture, Performance Optimization

PROFESSIONAL SUMMARY

Full-Stack AI Developer specializing in **TypeScript, Python, NodeJs**, with a strong focus on creating scalable and intelligent web applications. Experienced in integrating **Agentic AI workflows** and building production-grade systems with **Docker and AWS**. Confident about developing efficient architectures, optimizing backend performance, and crafting seamless user experiences across platforms.

EXPERIENCE

- Heizen (heizen.work)** Remote
SDE Intern Dec 2025 – March 2026
 - Feature Development:** Delivered core product modules including agentic RAGs, .
 - Collaboration:** Worked in Agile sprints for code reviews, feature planning, and bug resolution to maintain production stability.
- Kartavya Technologies (kartavyatech.com)** Remote
Backend Developer Intern Jun 2025 – Nov 2025
 - Feature Development:** Delivered core product modules including clock-in systems and utility management used by 1,000+ employees, improving operational tracking efficiency by 25%.
 - System Optimization:** Enhanced backend query performance by 30% and automated deployment workflows using Docker and GitHub Actions.
 - Release Management:** Streamlined release cycles, reducing update downtime by 40% by doing Blue Green Deployment.
 - Collaboration:** Worked in agile sprints for code reviews.

PROJECTS

- Watt AI:**
Built an Agentic AI workspace extending standard capabilities with persistent memory, reusable procedures, and workflow automation. Learns user preferences, recurring tasks, and execution patterns to reduce repetitive interactions while remaining compatible with familiar chat workflows.
Added custom AI tools and agentic capabilities to streamline complex workflows beyond traditional AI chat interfaces. Built on top of AI-Edge, leveraging its provider-agnostic gateway for inference, files, vector stores, web search, and code execution.
Tech Stack: AI SDK, Next.js, AI-Edge, TypeScript, S3, MongoDB, Redis
GitHub Repository
- AI-Edge:**
Built an AI gateway that abstracts AI provider integrations, enabling applications to switch between OpenAI- and Anthropic-compatible providers without application-level code changes. Supports Chat Completions, Messages, Skills, Files, Vector Stores, STT, TTS, Web Search, and Code Execution, and integrates seamlessly with AI harness tools such as Claude Code, GitHub Copilot, and OpenCode.
Tech Stack: Hono, MongoDB, Redis, S3, Tavily, Daytona
GitHub Repository

CERTIFICATIONS

- Completed Generative AI Development and Full Stack Web Development Certification
- Achieved 5th position in the HackArena Hackathon Finals
- Solved 300+ problems on LeetCode.
